

Action Floors Introduces Synthetic Sports Floor

(MERCER, WI) Action Floor Systems, a leading manufacturer of premium hardwood maple sports floors, has added a multi-use synthetic floor to its product line. Action Herculon® is a high-performance, monolithic, non-porous floor featuring a urethane top coat and 2-millimeters of seamless, self-leveling polyurethane over a sealed rubber base mat.

Available exclusively through Action Floor Systems, the Herculon dual-durometer floor provides high uniformity of play and is extremely durable, with excellent tear and tensile strength. A DIN-certified version is available in Herculon PE.

Action Floor president, Gary Stephenson, says, "Herculon is a high-quality addition to our comprehensive line of floors. Some customers prefer it for the entire playing surface, while others employ it as a running track with a premium Action maple system as the centerpiece for volleyball and basketball."

Action Herculon floors are available in a choice of 16 colors, including shades of beige, gray, green, blue and red.

Action hardwood sports floors are produced in the company's plant in Mercer, Wisconsin and constructed of top-grade, hard maple lumber grown from trees exclusively in northern Wisconsin and Upper Michigan...the hardest, finest-grained, and most sought-after hard wood available for top-quality athletic surfaces.
