## **ACTION FLOOR'S NEW CUSHIONED ATHLETIC FLOOR IS PERFECT FOR RETROFITS**

(Mercer, WI) The Action Anchor Flex LP system from Action Floor Systems, is a low-profile anchored and cushioned maple floor system designed to replace existing continuous strip and channel and clip systems.

The Action Anchor Flex LP system features solid maple flooring over a layer of predrilled, factory assembled plywood panels and a continuous 1/4" DR closed-cell foam cushion layer. It is secured by anchoring into a concrete slab. The downward movement of the floors panels makes the Anchor Flex LP highly resilient, offering uniform playability and consistent shock absorption to reduce injuries to athletes. Ideal for new and retrofit installations, Anchor Flex LP is suitable for gymnasiums for a wide variety of athletic activities, dance floors and aerobics.

Action Floor Systems is a leading manufacturer of premium hardwood maple and synthetic sports floors. Action hardwood sports floors are produced in the company's plant in Mercer, Wisconsin and constructed of hard maple timber grown exclusively in northern Wisconsin and Upper Michigan—the hardest, finest-grained, and most sought-after wood available for top-quality athletic surfaces.
