

THE UNIVERSITY
of
WISCONSIN
MADISON

This certificate recognizes

ACTION FLOOR SYSTEMS'

environmental stewardship. Their initiative to explore a Life Cycle Analysis of their products and processes has shown clear leadership and good stewardship of the wood resource they utilize and the quality products they produce.

A Life Cycle Inventory conducted by the University of Wisconsin has demonstrated that more carbon is stored in Action Floor Systems' solid strip hardwood flooring than is released during its manufacturing process; giving their flooring products a carbon negative footprint. Action Floor Systems produces an environmentally responsible alternative to competing products.

Scott Bowe

Scott Bowe, Professor of Wood Products, University of Wisconsin
